

Amendments to the Specification

Please replace the pending title with the following new title:

**APPARATUS AND METHOD FOR TREATING DISABILITIES SUCH AS
ADD, ADHD, DYSLEXIA AND DYSPRAXIA**

Please replace the pending Abstract with the following new Abstract:

An apparatus and method is disclosed for treating disabilities, such as ADHD, ADD, Dyslexia and Dyspraxia. A physiological sensor monitors a physiological activity of a subject. A program module is linked to the physiological sensor and operates an actuator in correlation with the physiological sensor. The actuator moves a surface in contact with the subject in correlation with the physiological activity. The subject also performs a movement task with a hand-operated device and the performance of the task is monitored by the program module.
